Characteristics and typical fields of application

Avesta 308L/MVR Cryo is a Cr-Ni electrode for all position welding of 1.4301/ASTM 304 type stainless steels, primarily for use in low temperature applications. The carefully controlled chemical composition gives a weld metal with ferrite content in the range of 3 – 8 FN (WRC-92) and very good toughness down to -196°C as specified for LNG applications.

Corrosion resistance:

Good resistance to general corrosion.
