

PS-H250

Large, horizontal valve test bench for testing shut-off and control valves

- DN100 (4") – DN1000 (40")
- For testing shut-off valves and control valves
- For flanged, threaded and welded valves
- Stationary, horizontal
- Test medium: air / water
- Max. test pressure: DN100 (4") / 200 bar (2900 psi) – DN1000 (40") / 25 bar (363 psi)
- Evacuation of valve to be tested for subsequent water test via built-in vacuum pump with water separator
- Clear and uncomplicated operation
- Proportional control to protect the housing against deformation.
The clamping pressure is increased in proportion with the increase in test pressure.

Subject to technical change.
